

ENTRY-LEVEL CIVIL ENGINEER RESUME TEMPLATE FOR GRADUATES

Designed specifically for entry-level civil and structural engineers, this layout emphasizes field internships, construction site inspections, and CAD modeling experience. It offers a professional, ATS-compatible outline to help recent graduates showcase their engineering degree and certifications effectively. The layout starts with an engineering profile to define your focus area (such as transportation, environmental, or geotechnical engineering). The work history block is optimized to outline cooperative education roles, capstone design projects, and structural design calculations. A technical skills list highlights drafting software like AutoCAD, Civil 3D, and Revit alongside project management competencies.
